

# Revolutionary, Green Way to Treat Bed Bugs

As children our parents would often tuck us into bed at night and say, "Sleep tight, don't let the bed bugs bite." Looking back, Ed Blumling, Owner/Partner of Ridder Thermal Management LLC in Troy, wonders what would ever possess our parents to say such a thing; as an adult he understands they weren't kidding.

**Bed bugs do exist.** Unfortunately are those who have had to live with the real bug. For those who have had an occurrence, or those currently experiencing an infestation, you can bet that they are not having sweet dreams.

your home or office of these blood-sucking pests.

**Ed Blumling and Bill Canning,** Co-Owners of Ridder Thermal Management LLC have become the saving grace when it comes to terminating bed bug infestations by turning up the heat, literally. Studies have shown that by using thermal heaters and raising the temperature of the rooms being treated over 120 degrees, that not only will it kill the bugs dead in their tracks, it will also kill their eggs. "This cleaner, greener method offers a non-chemical alternative for bed bug control. Not only is it safer for

replacement and leave you with sweet dreams.

With over 25 years of experience offering a green and safe solution in the treatment of bed bug infestations, Ridder Thermal Management LLC is the leader in thermal heat treatments and the only of its kind in the state of Michigan. Ridder will leave your home or office with a cleaner, greener environment. For more information call 248-273-0000 or visit [www.ridderthermal.com](http://www.ridderthermal.com).

**BED BUGS REALLY DO EXIST, in some of the nicest places.** Ed Blumling and Bill Canning, co-owners of Troy-based Ridder Thermal Management will help you get rid of the nasty critters in a very green way; just call 248-273-0000.

"This is definitely not a dying industry considering that there has been more than a 500 percent increase in bed bug cases in the past five years and more than 50 percent are not manageable with traditional pesticide treatments," says Blumling knowingly.

**These creepy, crawly critters** can hitch rides on anyone and anything. Clothing, shoes, purses, and luggage are all means of transportation for these hitchhikers. Even rental furniture and trucks can harbor these creatures causing someone to unknowingly cross their path. The good news is there is a safe and effective way to rid

the clients and their pets, but it is so effective that in just six hours all bed bugs can be totally eliminated. The traditional method for treating bed bugs requires multiple treatments, taking anywhere between 6 and 24 weeks, and with only limited success of complete eradication," states Bill Canning, Co-Owner.

**On a mission** to eliminate metro Detroit's pesky problem, this bed bug task force may even save clients money. In this time of cost conservation, utilizing Ridder Thermal Management LLC can save clients thousands of dollars in furniture

## Detroit Local to Face Off Against Tiger Woods in Gillette Champions of Gaming

GAMING CHAMP, from page 1

After outlasting thousands of gamers, Williams emerged victorious as the U.S. winner.

**As the winner,** Brad will fly to Orlando, Florida on Sunday, February 1, where he will compete against winners from England and Australia for the right to sit down for a one-on-one match-up with the biggest sports star in the world – and his sports idol – Tiger Woods. (Rumor has it that Brad will be very hard to beat.)

Since this is Michigan, Brad, a Kimball High grad who is laid off from his construction job, should have a good time. Besides, he admits that he really does like gaming. In fact, he adds that "my girlfriend would probably say I'm addicted. I was always kind into video games."

**Brad is a long time** gamer and while he's more excited to meet Tiger

than anything he's ever done, this isn't his first rodeo in video game competitions – in 2008 he won a Buick Enclave by playing Tiger Woods golf!

In addition to hanging out with Tiger, Brad will receive free passes for himself and a guest to Disney World and tour of the EA Studios in Orlando to see how video games are actually created. He'll also be heavily involved in the unveil of Gillette's new male razor – the aptly named 'Gamer.'

**Brad will also** be able to meet incredible athletes like Gillette spokesperson Derek Jeter, NASCAR driver Denny Hamlin, WWE wrestler John Cena and major NBA and NFL personalities yet to be named who will also be on-site to interact with fans competing in their respective video games.

And, Brad reports, he's been invited to test some new games, too.
